## **“NO SWIMMING” ADVISORY LIFTED FOR A PORTION OF LONG CREEK AND LAKE WYLIE**

---

**Mecklenburg County, NC** – A **NO SWIMMING** advisory was lifted today for lower Long Creek near the confluence with Lake Wylie and Lake Wylie below Long Creek to Wilkinson Boulevard in Mecklenburg County. The advisory had been issued following the discharge of untreated sewage to Long Creek, which enters Lake Wylie just upstream of the US National Whitewater Center.

Water samples collected by Charlotte-Mecklenburg Storm Water Services’ staff reveal that bacteria counts are within safe limits; therefore, the **NO SWIMMING** advisory has been lifted.
